

InfraPPP Advisory Services shortlisted for PPP transaction advisory tender in Sierra Leone

InfraPPP Advisory Services has been shortlisted as part of a team composed of international financial advisors and local technical firms.

InfraPPP, jointly with one of the Big Four financial advisory firms and a local architecture studio, will present a technical and financial proposal to be selected as transaction advisor for the development of King Jimmy public market, mixed mall and business park under a PPP scheme.

The Freetown City Council intends to develop a modern mixed-uses project in a historic site. The urban design concept is to be an integrated mixed-use development incorporating the public market, retail space, hotel accommodation, food courts, commercial office space and waterfront designed to create a community identity whilst at the same time expanding opportunities for year round market & retail activities and business services in the heart of Freetown.

It is initially proposed to develop the project as a Public Private Partnership (PPP). FCC intends to develop a Pre-Feasibility Study to identify whether this development represents a potential well-structured bankable PPP project.

Alvaro de la Maza, Partner of InfraPPP, commented: “This is a new step further in the development of InfraPPP as a key PPP advisor in Emerging Countries. We think our consortium is very well placed for this opportunity and hope to be able to make our business grow in the ECOWAS area with projects like this.”
